Dear Mr Results,

Thank you for choosing the GLCheck test. Please find enclosed your GLCheck results and support pack.

What should I do next?

1. Read through your GLCheck laboratory test results

Your results are divided into two sections as follows:

Personal details - Your individual test results are included in this section along with your BMI (body mass index) which is provided as a guide for your height to weight ratio.

Results - This section includes your individual colour-coded GLCheck score, plus a summary of what your results mean.

2. Read through the results guidebook

It is important that your test results are read in conjunction with your results guidebook as this contains important information on your GLCheck score.

If you have any questions regarding your GLCheck results, please do not hesitate to call the Customer Care team on **0800 1300 588**.

Yours sincerely,

Dr Gill Hart MIBMS

GL Check Result

Your overall GLCheck score is GREEN

Result Summary

Your overall GLCheck score is GREEN. This means that your glycosylated haemoglobin level is in the acceptable range. People who take this test are often concerned about an aspect of their health. What prompted you to take the test? We would advise you read the enclosed results guidebook, as it provides detailed information on your green score. If you are concerned about your health then you should always refer to your GP.

GLCheck results are provided for informational purposes only and are not a substitute for professional medical advice. You should not use this information for diagnosing or treating a medical or health condition. If you feel unwell or suspect that you have a medical problem, promptly contact your GP.
